

BOX WRAPPING MACHINE P409

- **Efficient speed of 30 RPM** for quick packaging turnaround
- **Adjustable settings** optimize wrapping process for various products
- **Large diameter rotary table (ø60cm)** ensures efficient handling of diverse items
- **High-quality construction** maintains optimal operating conditions for consistent performance
- **Detailed security lock provides stability** and safety during operation
- **Lightweight and compact design** facilitates easy transportation and setup
- **User-friendly interface streamlines operation**, reducing training time
- **Robust motor with 25W power** delivers reliable and efficient wrapping
- **Load weight capacity up to 70kg** accommodates heavy or bulky packages
- **For different package sizes** - allows flexibility for different packaging needs
- **Fast Delivery**
- **Warranty**

BOX WRAPPING MACHINE P409

The Box Wrapping Machine P409 is a game-changer in the world of packaging. Engineered for efficiency and ease of use, this package wrapping machine streamlines your packaging process, ensuring quick and reliable results every time. With a **rapid rotational speed of 30 RPM** powered by a **robust motor**, it **effortlessly wraps packages with precision and speed**, meeting tight deadlines without compromising on quality.

Compact and lightweight the Box Wrapping Machine P409 is designed for convenience. Its simple assembly process allows for swift setup, so you can get straight to work without any hassle. **Crafted from durable sheet metal**, it offers unparalleled durability, capable of **withstanding heavy loads** and resisting rust and corrosion for long-lasting performance.

Operating the Box Wrapping Machine P409 is a breeze, thanks to its user-friendly interface and **adjustable speed settings**. Whether you're wrapping products of varying sizes or using different materials, this machine adapts to your needs with ease. Plus, its versatile design accommodates stretch film or honeycomb paper, offering flexibility for diverse packaging requirements.

SPECS OF PACKAGE WRAPPING MACHINE P409

Product name	Box wrapping machine
Model	P409
Load weight	70kg
Turntable size	60cm
Wrapping material	PE film
Roller height	Short roller:45cm Long roller:85cm
Speed	30r/Min
Product size	107*42*26cm,30kg

Voltage	220V,50-60HZ(110V also can do, please contact supplier)
Power	25W
Usage	All kind package outside film wrapping
Wrapping type	Electric automatic

KEY FEATURES OF BOX WRAPPING MACHINE P409

Details show

speed regulator

Maximum speed: 50r/min

HOW DOES BOX WRAPPING MACHINE P409

WORKS?

The Box Wrapping Machine P409 operates through a simple yet effective process designed to efficiently wrap packages with ease. Here's how it works:

- 1. Loading the Package:** The process begins by placing the package to be wrapped onto the machine's turntable. The turntable, equipped with a patented hand-grip design, securely holds the package in place during the wrapping process.
- 2. Adjusting Settings:** Before initiating the wrapping process, the user can adjust settings on the machine's user-friendly interface according to the size and type of package being wrapped. This may include adjusting the rotational speed of the turntable to ensure optimal wrapping.
- 3. Initiating Wrapping:** Once the settings are adjusted, the user initiates the wrapping process. The machine's powerful motor begins to rotate the turntable at a rapid speed, facilitating the wrapping of the package with precision and efficiency.
- 4. Applying Wrapping Material:** As the turntable rotates, the user applies the wrapping material – typically stretch film or honeycomb paper – around the package. The material may be fed manually or automatically, depending on the specific configuration of the machine.
- 5. Securing the Wrap:** The user ensures that the wrapping material is applied securely around the package, providing sufficient tension to hold the contents in place while also allowing for easy removal upon receipt.
- 6. Completing the Process:** Once the wrapping process is complete and the package is adequately wrapped, the user stops the machine's rotation and removes the wrapped package from the turntable. The package is now ready for storage, shipment, or display, depending on its intended use.

Overall, the Box Wrapping Machine P409 simplifies the packaging process by automating the wrapping of packages with precision and efficiency, making it an essential tool for businesses seeking to optimize their packaging operations.

ADVANTAGES OF BOX WRAPPING MACHINE P409

The Box Wrapping Machine P409 offers a multitude of advantages, making it an indispensable tool for packaging operations:

1. **High Rotational Speed:** With a rotational speed of 30 RPM, powered by a robust motor, the P409 ensures rapid and efficient packaging, minimizing processing time and maximizing productivity.
2. **Adjustable Settings:** The P409 allows users to adjust the speed of the machine according to the size of the product, ensuring optimal wrapping and minimizing material waste.
3. **Dual-Purpose Design:** Equipped with a double-rod design, the P409 can accommodate both stretch film and honeycomb paper, providing versatility and flexibility in packaging options.
4. **Large Diameter Rotary Table:** Featuring a 40 cm rubber friction surface, the P409's rotary table can handle a wide range of products, ensuring secure and efficient packaging for various sizes and shapes.
5. **High-Quality Insulation Shell:** The P409 is equipped with a footswitch shell made of ABC plastic, ensuring durability, safety, and frequent use without compromising performance.
6. **Wheels can be securely locked:** Designed with a detailed security wheel lock, the P409 ensures the machine is fixed securely during operation, providing a safe and stable working environment.
7. **Simple Operation:** The P409's user-friendly interface and straightforward operation make it easy to use, minimizing training time and enabling operators to efficiently wrap packages with minimal effort.

BOX WRAPPING MACHINE P409 IS HIGH-QUALITY MACHINE

HIGH QUALITY INSULATION SHELL

This kind of footswitch shell is made of ABC plastic, which is firm and safe and can be used frequently.

BENEFITS OF BOX WRAPPING MACHINE P409

The benefits of the Box Wrapping Machine P409 are numerous, catering to the needs and demands of modern packaging operations:

1. **Increased Productivity:** By automating the packaging process, the P409 reduces the time and labor required for wrapping packages, allowing businesses to increase their output and meet customer demands more efficiently.
2. **Cost Savings:** With its efficient operation and reduced labor requirements, the P409 helps businesses save on labor costs and minimize packaging waste, resulting in overall cost savings for the organization.
3. **Improved Efficiency:** The rapid rotational speed and user-friendly interface of the P409 enhance packaging efficiency, ensuring that packages are wrapped quickly and accurately, thereby streamlining operations and reducing bottlenecks.
4. **Enhanced Product Protection:** The precise wrapping capabilities of the P409 ensure that packages are securely wrapped, providing optimal protection for the contents during transit and reducing the risk of damage or loss.
5. **Versatility:** With its ability to accommodate different packaging materials and product sizes, the P409 offers versatility, allowing businesses to adapt to changing packaging requirements and cater to a variety of products.
6. **Reliability and Durability:** Constructed from durable materials and engineered for long-term performance, the P409 is reliable and built to last, minimizing downtime and ensuring consistent operation over time.
7. **Customer Satisfaction:** By providing secure and professionally wrapped packages, the P409 enhances customer satisfaction, leading to positive brand experiences and repeat business.

BOX WRAPPING MACHINE P409 HAS RUBBER FRICTION SURFACE OF TURNTABLE

The 40 cm rubber friction surface is large in diameter, practical and suitable for many products.

WHY BUY BOX WRAPPING MACHINE P409?

Investing in the Box Wrapping Machine P409 offers a multitude of compelling reasons for businesses seeking to optimize their packaging operations:

1. **Advanced Technology:** The P409 is equipped with state-of-the-art technology that ensures precise and efficient wrapping of packages. Its innovative features, such as the patented hand-grip turntable and adjustable speed settings, enable businesses to achieve consistent and professional results with every package.
2. **Customization Options:** With the ability to adjust settings according to package size and

wrapping material, the P409 offers customization options that cater to the specific needs of each packaging task. This versatility allows businesses to adapt quickly to changing requirements and achieve optimal outcomes.

3. **Space-Saving Design:** Despite its powerful capabilities, the P409 boasts a compact and space-saving design that fits seamlessly into any workspace. Its small footprint maximizes floor space utilization, making it an ideal choice for businesses with limited storage or production areas.
4. **Energy Efficiency:** Engineered for energy efficiency, the P409 minimizes power consumption without compromising on performance. Its efficient motor and intelligent design contribute to reduced energy costs, providing long-term savings and environmental benefits for businesses.
5. **Enhanced Safety Features:** The P409 is designed with safety as a top priority, incorporating features such as detailed security locks and sturdy construction to prevent accidents and ensure operator safety. By prioritizing workplace safety, businesses can create a secure and conducive environment for their employees.
6. **Adaptability to Industry Trends:** In a rapidly evolving marketplace, the P409 offers businesses the flexibility to adapt to emerging industry trends and consumer preferences. Whether it's eco-friendly packaging materials or innovative packaging designs, the P409 can accommodate evolving demands and stay ahead of the curve.

Overall, the Box Wrapping Machine P409 represents more than just a packaging solution – it's a strategic investment that empowers businesses to achieve operational excellence, adaptability, and competitive advantage in today's dynamic business landscape.

HOW TO BUY BOX WRAPPING MACHINE P409?

To buy box wrapping machine P409 simply click on the ADD TO CART button and proceed to checkout. Alternatively, you can click on the button GET OFFER and fill in your company information and our sales representatives will prepare a personalized offer for you and send it to your email address. Make your wrapping fast and efficient with our high-quality box wrapping machine P409.
